Subject: Passaic River Data
Lohmann_R_short.pdf

Hi Alice,

Dr Rainer Lohmann from URI is looking at the availability and bioaccumulation of 2378-TCDD and other compounds in the Passaic River in a research study for us. See attached. As part of this project we asked him to characterize his finding within the context of the Superfund project. To accomplish we would like to acquire the necessary contaminant data. I know that simply asking for "all the data" is not usually a productive method for getting what is needed so I'm wondering if you have a overview document of the available data that we can use to help us define our exact data request. Thanks for your help.

Regards,

Jim
